

THE MORE THINGS CHANGE

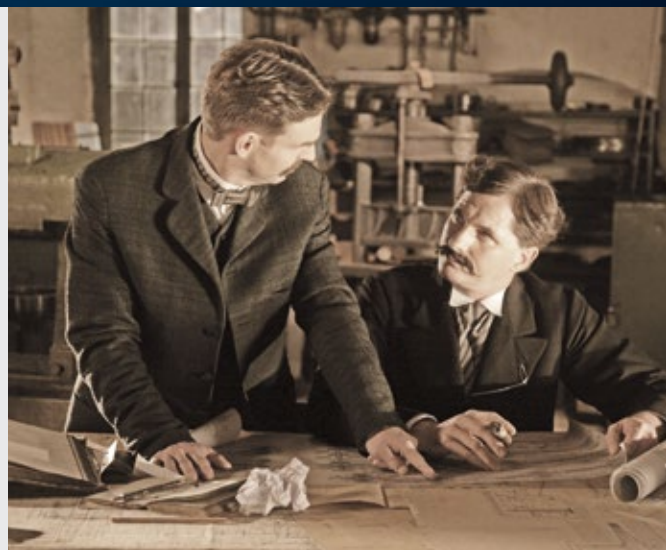

heselromberg.de

the more they stay the same.

The industrial production of steel tubes dates back to the ground-breaking invention of the Mannesmann Brothers in the late 19th century. Just a short while later Mannesmann became known and respected for its quality throughout the world.

Today, in the 21st century, Total is developing the **Laggan & Tormore fields**, in some of the most challenging **deep-sea environments** on earth. We have equipped this pioneering development with stainless steel and nickel alloy tubes, which remain the industry benchmark.

Salzgitter Mannesmann Stainless Tubes. Quality to make history.
